Looking for Volunteer to lead CFA Research Challenge

The University Research Challenge is a global competition in which student teams prepare an equity research report on an assigned company and present their findings to a panel of investment industry experts.

The winning team from each country goes to a regional final in Europe. Last year, the competition featured more than 4,000 students from over 865 universities worldwide.

We want to enter a team from an Israeli university for the first time and are looking for a volunteer to spearhead the project – starting with recruiting 2-3 universities to the project over the summer.
